

BLACK OXIDE & BLACK ZINC

Black-Finished Parts Available When You Want Them

1 DON'T GET BURNED BY PRICE INCREASES

You may have seen the recent price increases from various metal finishers. They were sudden and steep. But Kanebridge has not raised its prices on specially-plated parts. What we have increased are the number of items available with Black Oxide and Black Zinc finish.

2 WHY PLATE MORE PARTS THAN NEEDED?

To make it cost-effective to have parts specially-plated, you need to plate a large amount at one time. This just doesn't make sense if your customer only needs a smaller quantity. Kanebridge's small carton quantities solves that problem!

3 SAVE TIME & MONEY WITH KANEBRIDGE

This may sound cliché, but it's the truth—our prices for Black Oxide & Black Zinc fasteners have not increased, you can purchase small amounts and we will ship them to you today. It's a winning formula that works for distributors from coast to coast.

4 OVER 4,000 ITEMS / SAME-DAY SHIPPING

Our selection of fasteners available from stock with special finishes continues to grow. Recent additions include more Self-Drilling, Machine, Thread Rolling & Deep Thread Wood screws in Black Oxide, including many in Stainless Steel.
